

WELCOME NATURE HUNTERS!

Hunt down as many trees, wildflowers, birds and insects around the lake as you can.

We have given you this handy identification leaflet to help you.

Remember to tick the boxes as you go! You can also draw an arrow to where you saw them on the map.

Happy hunting!

INSECTS

Walk around the lake and see if you can see these insects.

Don't forget to check inside the flowers or see them hovering over the lake.

DID YOU KNOW?

All insects have 3 parts.

The head, the thorax (middle) and the abdomen (the end).

WILDFLOWERS

Wildflowers, plants and fungi are the life support for all our wildlife and their colour and character light up our park.

How many of these wildflowers can you spot? Remember not to pick them! The park's wildlife need our wildflowers to survive.

DID YOU KNOW?

The dandelion flower's seeds can travel up to 5 miles!

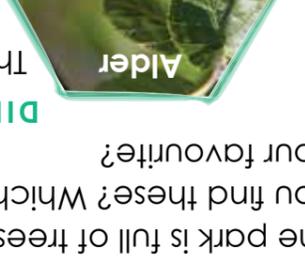

TREES

The park is full of trees. Can you find these? Which one is your favourite?

The trees in the park are important.

DID YOU KNOW?

They provide homes for all sorts of wildlife. They also help to keep our air clean and provide the oxygen we need to breathe. **Trees are amazing!**

BIRDS

Sit quietly around the lake. You might see some of these water birds.

The coot has feet with lobed flaps of skin which work like flippers.

If you listen carefully you can hear it patter over the water before taking off.

A female duck is called a **Hen** and a male duck is called a **Drake!**
